Service conditions

(1) Work done outside of Tallinn is subject to a fee for each kilometre travelled (round-trip) from the city limits. km 0,71 0,85

"(2) The cost of the service is calculated based on the duration of work performed on the site of the customer.

The minimum invoiced time is 1 hour. After the first hour, time is calculated in 30 minute increments. "

(3) The service is provided when the average daily temperature is at least 5 °C.

(4) The cost of the service includes the cost of drinking water.

(5) In addition to the service, the quantity of consumed drinking water is calculated at the rate of the legal person in the area of use of the standpipe.

(6) The service is provided in exceptional cases and when our resources are not occupied with the maintenance, repair or emergency work on the assets of AS Tallinna Vesi.

(7) If the water tank is used by the customer for more than a day, a fee will be added for water tank rental on the secured premises.

(8) The customer is invoiced if their complaint is found to be invalid – the measurement error of the meter is within permitted limits.

(9) Outside working hours (17:00–08:00) and on public holidays, the service is charged at 1.5 times the usual rate.
